

digitaldesign

our process

01

Consultation

Unveiling the client's business and personal needs and ensuring that both everyone understand the project and are in sync.

02

Prototyping

Creating and developing concepts and ideas. Planning and definition requirements for the projects.

03

Production

Development is started based on the requirements, time-lines and concepts established during the prototyping stage.

04

Deploy

Presenting to our client the final product for testing. Any required changes, comments and final suggestions are addressed and the web application is launched.

05

Support

Last but most important stage – post launch follow-up. We ensure clients vision's being met and offer solutions to ensure its continual effectiveness.
